

## Eades, Cassaundra

---

**From:** Lewis, Josh  
**Sent:** Thursday, September 12, 2013 8:57 AM  
**To:** Eades, Cassaundra; Mims, Kathy  
**Cc:** Miller, Linda  
**Subject:** Please close Van Hollen control (AL-13-000-9415)

You can put the email chain below in the CMS system so there's a record of my conversation w/ Van Hollen's staffer.  
Thanks.

**Subject:** RE: Follow up re: proposed gas station

Josh, just wanted to let you know that the constituent is happy with your referral. Let's see what happens. Many thanks, again, for your help. Sara

**Subject:** Follow up re: proposed gas station

Hi Sara,

As follow up to our call, here are the 2 things I promised:

(1) contact in MD DEQ:  
Jeffrey Fretwell  
[JFretwell@mde.state.md.us](mailto:JFretwell@mde.state.md.us)  
410-537-3537

(2) Here's a link to a chart that shows the national ambient air quality standards (NAAQS) for a number of pollutants, including nitrogen dioxide: <http://www.epa.gov/air/criteria.html> (and note there's a link in the far left column to the Federal Register notice in which we published the most recent final rule for NO2. Here it is as well: <http://www.gpo.gov/fdsys/pkg/FR-2010-02-09/html/2010-1990.htm>).

As I said on the phone, it's not 100% clear that your constituents are talking about the NO2 NAAQS when they say in their email that the "numbers for NO2 [are] way above the EPA regulation." Happy to track down other information as needed....just let me know.
